OpenSearch Dashboards

OpenSearch Dashboards is the web UI for [OpenSearch](#). You can use OpenSearch Dashboards to perform most tasks you can do with the OpenSearch APIs. You can also create visualizations and data dashboards with OpenSearch Dashboards.

Getting started

The following table provides resources for getting started with OpenSearch Dashboards.

To learn more about	Go to
An introduction to OpenSearch Dashboards	Getting started
Viewing a web-based, read-only OpenSearch Dashboards instance	The OpenSearch Playground
The OpenSearch Dashboards visualization tool	Using OpenSearch Dashboards
Installing and configuring an OpenSearch Dashboards instance or Docker image	Installing OpenSearch Dashboards and Configuring OpenSearch Dashboards

Exploring data

The following table provides resources for exploring and querying your data in OpenSearch Dashboards.

To learn more about	Go to	Quer
Exploring data quickly	Exploring data with Discover	Dash or Quer
Querying data	Using Query Workbench	Struc or Pipe
Querying data using the API	Running queries in the Dev Tools Console	Quer

Visualizing data

The following table provides resources for creating data visualizations and dashboards.

To learn more about	Go to
Visualizing data	Building data visualizations
Creating a data dashboard	Creating dashboards

Observability

The following table provides resources for observability features in OpenSearch Dashboards.

To learn more about	Go to
Observing, monitoring, and securing data and improving performance across tools and workflows.	Observability in OpenSearch Dashboards

Dashboards management

The following table provides resources for managing and customizing OpenSearch Dashboards.

To learn more about	Go to
Customizing the OpenSearch Dashboards behavior, creating index patterns, and configuring data sources.	Dashboards Management
